**Fund Value:** The value of the fund at any time will be equal to the number of units allocated multiplied by the Net Asset Value (NAV) of each unit in the fund.

**Unit Price:** The unit pricing shall be computed based on whether the company is purchasing (appropriation price) or selling (expropriation price) the assets in order to meet the day to day transactions of unit allocations and unit redemptions

**Valuation Date:** In case the valuation day falls on a holiday, then the exercise will be done the following working day. We reserve the right to value less frequently than every day in extreme circumstances, where the value of the assets may be too uncertain. In such circumstances we may defer valuation of assets until normality returns.

The Appropriation price shall apply in a situation when the company is required to purchase the assets to allocate the units at the valuation date as stated above. This shall be the amount of money that the company should put into the fund in respect of each unit it allocates in order to preserve the interests of the existing policyholders.

The Expropriation price shall apply in a situation when the company is required to sell assets to redeem the units at the valuation date as stated as above. This shall be the amount of money that the company should take out of the fund in respect of each unit it cancels in order to preserve the interests of the continuing policyholders.

### Computation of NAV

---

**When Appropriation price is applied:** The NAV for a particular fund shall be computed as: Market value of investment held by the fund plus the expenses incurred in the purchase of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before any new units are allocated), gives the unit price of the fund under consideration.

**When Expropriation price is applied:** The NAV for a particular fund shall be computed as: Market Value of investment held by the fund less the expenses incurred in the sale of the assets plus the value of any current assets plus any accrued income net of fund management charges less the value of any current liabilities less provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before any units are redeemed), gives the unit price of the fund under consideration.

#### Premium Redirection:

You may instruct us in writing to redirect all the future premiums under a policy in an alternative proportion to the various unit funds available without affecting previous allocation of premiums.

#### Switching Option:

Switching gives you the flexibility to alter the allocation of your investments among the funds to suit your changing investment needs. At any time during the policy term, you may instruct the Company, in writing, to switch some or all of the units from one unit linked fund to another. You are entitled to 52 free switches in any policy year. Unused free switches cannot be carried forward to a following year.

#### Pay Top-up Premium(s):

You can use your bonus or some lump sum money to increase investments component. The minimum top-up is Rs. 2,500. The total top-up premiums at all times should not exceed 25% of the total regular premiums paid till that time. Top-up are accepted only when due basic premiums are paid up to date.

#### Partial Withdrawals:

Partial withdrawals are available after a period of 3 years from the date of commencement of the policy or on attainment of age 18 by the life assured whichever is later. There would be a 3-years lock-in period on the top-up premium(s) from the date of payment of each top-up premium(s). This condition will not apply if top-up premium(s) are paid during the last 3 years before the

maturity. The minimum amount of partial withdrawal is Rs. 5000 and the maximum amount should not exceed 20% of the policy fund value in that policy year. However, at any point of time during the policy term, the minimum fund balance after the partial withdrawal should be at least equal to 125% of the annualized premium. Partial Withdrawal charges applicable. Refer the section on Charges.

#### Foreclosure of the Policy:

If at any point of time the fund value is less than the mortality and policy administration charge for the next month, the policy will be foreclosed by paying the fund value.

#### Systematic Transfer Plan (STP):

STP helps in mitigating the risk arising from volatility in equity markets by averaging out your cost of purchase of units. STP allows policy holder to invest the portion of premium or top-up premium(s) meant for New Equity Fund initially into New Money Market Fund. On the date of realization of the installment premium cheque, units will be allocated in the New Money Market fund for the portion of premium meant for New Equity Fund. On each of the next four Systematic Transfer dates (7th, 14th, 21st & 28th of every month) one-fourth of the STP units will be transferred to the equity fund automatically. The selection or de selection of STP can take place only on the policy anniversary. No further switches are allowed during STP period in respect of the fund amount under STP option. Once STP option is selected it can't be cancelled in respect of the amount already lying in the STP fund.

#### Exchange Option:

This option is available for existing policyholders of Reliance Life Insurance Company Ltd after completion of 3 policy years from the date of commencement. Under this option, the policy holder can transfer policy benefits (surrender, maturity etc.) either fully or partially to another plan of Reliance Life Insurance Company Ltd, having exchange options facility at a reduced allocation charge. In the event of death of the life assured during settlement period the fund value as on the date of intimation of death at the office will be paid to the nominee. During settlement period the total fund balance would be automatically moved into New Fund C.
