How does the plan work?

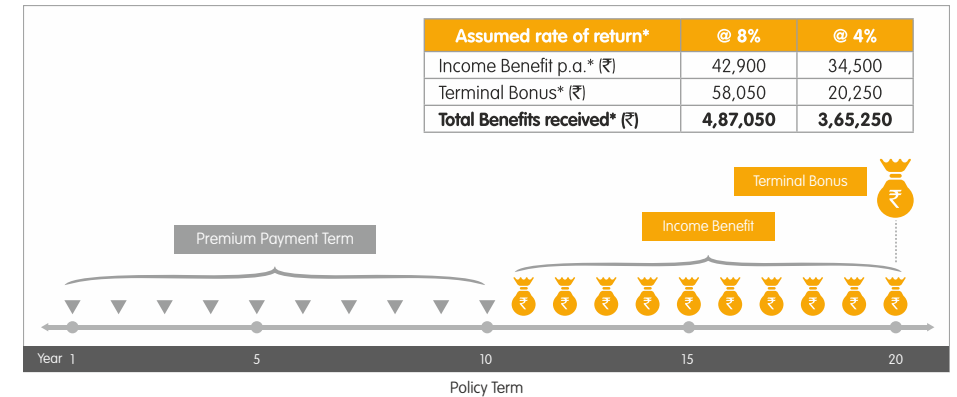

Let's take an example

Nikhil, aged 30 years, is a salaried employee and stays with his wife Anita and their 5 year old daughter Mansi. He wants Mansi to get the best of the education and to grow into an independent career woman. He wants to save money while he is in the peak of his career, and create an avenue with a regular stream of income to take care of his daughter's higher education expenses in later years.

Nikhil opts for Reliance Nippon Life Future Income with a Base Sum Assured of ₹3,00,000 and Policy Term 20 years, assuming he is in good health he pays a premium of ₹28,302 p.a. (excluding taxes) for 10 years.

Scenario I: If Nikhil, i.e. the Life Assured, survives till the maturity date, he receives benefits as mentioned below:

- Simple Reversionary Bonus will accrue during the premium payment term
- Simple Reversionary Bonuses shall be ₹1,29,000 at an assumed return of 8% and ₹45,000 at an assumed return of 4%
- Base Sum Assured along with the vested Simple Reversionary Bonuses shall be used to provide an annual income benefit at the end of every subsequent Policy Year after the premium payment term, i.e. (Base Sum Assured + vested Simple Reversionary Bonus) x Income Benefit Factor
- For Policy Term of 20 years the Income Benefit factor is 10%, thus the Income Benefit payable at the end of every Policy Year after the premium payment term at an assumed return of 8% shall be $(3,00,000 + 1,29,000) \times 10\% = ₹42,900$ and at an assumed return of 4% shall be $(3,00,000 + 45,000) \times 10\% = ₹34,500$
- At Maturity, Nikhil may receive last installment of the Income Benefit along with the Terminal Bonus, if any, i.e. ₹1,00,950 at an assumed return of 8% and ₹54,750 at an assumed return of 4%.

Scenario II: In case of unfortunate demise of Nikhil at the end of the 8th Policy Year (during the premium payment term)

Total Death Benefit* (₹)	4,18,680	3,41,400

Scenario III: In case of unfortunate demise of Nikhil in the 13th Policy Year (after the premium payment term), Nikhil would have already received two installments of Income Benefit, therefore Income Benefit received before death

Assumed rate of return*	@ 8%	@ 4%
Income Benefit p.a.* (₹)	42,900	34,500
Total Income Benefits received* (₹)	85,800	69,000

*The values shown in scenarios above are for illustration purpose only, based on assumed investment returns of 8% and 4%. These values are not guaranteed and are not the upper or lower limits of what one might get in this policy as the value of your policy is dependent on a number of factors including future investment performance.

The benefit payable on death after the premium payment term shall be
