5.1.4. Creation of units

Where Regular Premiums and Top-up premiums are received and accepted at the Company's Office on a Business day, the number of units to be created shall be computed using the NAV per unit (Unit Price) as determined on the Valuation Date.

5.1.5. Computation of Net Asset Value (NAV)

The NAV will be computed as per IRDA (Linked Insurance Products) Regulations, 2013.

The NAV for a particular fund shall be computed as: Market Value of investment held by the fund plus the value of current assets less the value of current liabilities and provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before creation/redemption of units), gives the unit price of the fund under consideration.

In case the valuation day falls on a holiday/non business day, then the exercise will be done on the following working day.

For a very large transaction above a threshold level, in order to maintain equity and fairness with all unit holders, we may choose to apply special treatment for all transactions, which involve purchase or sale of underlying assets. The number of units allocated may reflect the expenditure incurred in the actual market transactions which occurred. The value of units obtained from encashment may be the actual value obtained as a consequence of the actual market transactions which occurred. Transactions may occur over a number days. The threshold level will vary from time to time, depending on, amongst other matters, the liquidity of the stock markets. Our current threshold for large transactions will be Rs.50,000,000 for a fund predominantly investing in Government securities and Rs.25,000,000 for a fund investing in highly liquid equities.

We reserve the right to value fund less frequently than daily in extreme circumstances, where the value of the assets may be too uncertain. In such circumstances company may defer valuation of assets for up to 30 days until the company feels that the certainty as to the value of assets has been resumed. The deferment of the valuation of assets will be with prior consultation with IRDAI. The above may result in delay in encashment of units. Examples of such circumstances are:

Policy Document – Reliance Nippon Life Classic Plan II

- a) When one or more stock exchanges which provide a basis for valuation for a substantial portion of the assets of the fund are closed otherwise than for ordinary holidays
- b) When, as a result of political, economic, monetary or any circumstances out of our control, the disposal of the assets of the unit fund are not reasonable or would not reasonably be practicable without being detrimental to the interests of the remaining unit holders
- c) During periods of extreme volatility of markets during which surrenders and switches would, in our opinion, be detrimental to the interests of the existing unit holders of the fund
- d) In the case of natural calamities, strikes, war, civil unrest, riots and bandhs
- e) In the event of any force majeure or disaster that affects our normal functioning
- f) If so directed by the IRDAI.

The policyholder will be notified of such a situation, if it arises.

5.1.6. Factors determining allocation

Units are allocated under the policy depending on the amount of premium paid, the allocation rate and the prevailing NAV per unit (Unit Price).

5.1.7. Allocation of units

Renewal premiums received in advance will be kept in the deposit account and will not earn any returns until the renewal premium due date on which the same will be applied to the unit funds.

In respect of premiums received or funds switched up to 3.00 p.m. by the Company along with a local cheque or a demand draft payable at par at the place where the premium is received, the closing NAV per unit (unit price) of the day on which the premium is received or funds switched, shall be applicable.

In respect of premiums received after 3.00 p.m. by the Company along with a local cheque or a demand draft payable at par at the place where the premium is received, the closing NAV per unit (unit price) of the next business day shall be applicable.

In respect of premiums received with outstation cheques or demand drafts at the place where the premium is received, the closing NAV per unit (unit price) of the day on which cheques / demand draft is realised shall be applicable.

In the event that units are held in more than one Fund, the cancellation of units will be effected in the same proportion as the value of units held in each Fund. In case the Fund Value in any fund goes down to the extent that it is not sufficient to support the proportionate monthly charges, then the same shall be deducted from the Fund Value of the other funds.

5.1.11. Credit/Debit of units

Premiums received, after deducting the base / top-up premium allocation charge will be used to purchase units at the unit price according to Policyholders' instructions for allocation of premium.
