Fund Report as on 30th September 2021

Equity Markets

The Month That Was

Indian equity markets continued to outperform most global markets with Nifty50 Index gaining 2.8% during month of September. Broader markets performed a little better with midcap/small-cap indices gaining between 4-6%. Recovery in domestic economy, rapid pace of vaccination and absence of third wave of Covid cheered up the markets scaling new highs while ignoring global events like tapering of asset purchase by US Fed and fear of contagion from default of Chinese real estate developer Evergrande. With over 890 mn doses of vaccine administered till end of September, India's vaccination program continued at a good pace with nearly 70% of adult population having taken at least one dose so far. Even though consumer sentiment may not have recovered fully, absence of Covid wave 3 resulted in many high frequency indicators like toll revenues, e-way bills, electricity consumption railway freight, GST collection being better than pre-Covid levels. On the expectation of domestic recovery, sectors linked to domestic consumption such as real estate, consumer durables, automobiles, banking performed well during the month of September while sectors with global exposure like Metals, Information Technology and Pharma underperformed.

Some of the other key developments for the month were:

- After disappointing months of July and August, monsoon rainfall picked up in the month of September to end the season with normal monsoon
- CPI inflation for month of August eased out to a 4-month low of 5.3% due to moderation in food prices and due to a high base effect
- Government announced a provision of Rs 30,600 crore in guarantees to National Asset Reconstruction Company Limited (NARCL) to buy bad loans from the banks
- US Fed announced that it may look to start tapering of bond buying program by end of current calendar year while keeping interest rate low longer
- Both Fils and Dils were buyers of Indian equities during the month with net purchases of USD 1.2 bn and USD 0.8 bn respectively.

Fund Report as on 30th September 2021

Market Outlook

As we enter the festive season, domestic consumption remains robust and industrial activities have started picking up. In the absence of a Covid wave 3, second half of FY22 should see good pick up in revenue and earnings growth for companies focused on domestic consumption. Also, green-shoots for recovery in private capex are already seen on the back of pick-up in consumer demand, strong operating cashflow and balance sheet for many large and mid-sized companies. Due to strong pricing environment in last few quarters, many companies in metals and material sector have reduced their leverage significantly and are ready to undertake next stage of capex and growth.

Even though domestic economic recovery continues to support equity markets, some global factors may induce bouts of volatility intermittently. Any change in stance by FlIs in terms of inflow into emerging markets once US Fed tapering starts by end of the year need to be watched out. We don't expect a major deterioration in FlI flows into Indian markets as India has remained as one of the most preferred investment destinations among emerging markets for foreign investors of late. In terms of domestic interest rate environment, easy monetary policy may be coming to an end sooner than later. However, any interest rate hike is expected to be gradual so that it doesn't adversely impact the recovery in growth.

Indian equity market has been a standout performer compared to most other markets globally over last one year. While the phenomenal gains from equity market during the past year may not be repeated in near future, there are still many pockets of opportunities especially on the theme of domestic economic recovery. On this theme, we are positive on sectors like Banking, Housing Finance, Consumer Discretionary, Consumer Staples, Telecom and Cement. We also like Information Technology sector over medium term which is a proxy for digital transformation taking place around the world post Covid. Earnings growth trajectory for Indian equity market is expected to be robust in near future supporting the current elevated valuation levels. We remain structurally positive on Indian markets as economy resumes its journey of double-digit growth over next few years.

Fund Report as on 30th September 2021

Fixed Income Markets

Federal Open Market Committee (FOMC) in September 2021, while decided to keep the rates unchanged and maintain "Accommodative Stance" to support the economy, the committee guided for critical events towards normalisation of monetary policy. The committee reviewed and acknowledged economic recovery to be on track and hence, warranted moderation in asset purchases in coming months, with hinting to conclude tapering process by mid of 2022. The overall tone of the policy seemed to be "Hawkish", with chances of rate hike towards the end of 2022 been balanced, with 9 of 18 members having view for rate hike in 2022. Post the announcement of policy, US 10- year bond yield topped to 1.56% last week, its highest point since June 2021.

Reserve Bank of India's (RBI) Monetary Policy Committee (MPC) is scheduled between October 6-8, 2021 and may see an active debate on the pace of normalization of the policy. In its last MPC in August 2021, RBI had kept repo rate unchanged while maintaining "Accommodative Stance" to support the economy. For context, the MPC had opted to retain the key policy settings in the meeting. Most MPC members view current level inflation to be more supply-side driven. Few members expressed concern that inflation was becoming more persistent and broad-based, even as a few considered parts of it being transitory. Most members felt the need to be watchful of inflation.

Consumer Price Index (CPI) inflation moderated to 4-month low to 5.3% in August 2021 compared to 5.6% in July 2021 led by easing food inflation to 3.8% compared to 4.5% in preceding month. Main drivers of lower food inflation were cereals and vegetables which has ~34% weight in food basket.

Fixed Income Markets

Yield on 10-Year benchmark Government Security traded in 6.17%-6.25% range during September 2021. RBI completed G-Sec Acquisition Programme 2.0 (G-SAP 2.0) of Rs.1,20,000 Cr for Q2FY22 in September 2021, of which Rs.30,000 Cr was completed in September 2021. The central bank's proactive and pre-emptive approach along with a commitment to support growth in FY2022, is expected to ease the pressure on yield curve.

RBI's support in form of G-SAP/OMOs is expected to ensure government's borrowing programme is managed in a non-destructive manner.

Fund Report as on 30th September 2021

Outlook:

Economic activity is expected to continue improving, especially around the festive season as the vaccination trend continues to improve. While the growth prospects look optimistic going ahead, we remain wary on the risk of a third wave before a larger population gets fully vaccinated.

MPC's forward guidance may also be tweaked to acknowledge growth revival and that could in turn set the stage for phased normalization in near term. Followed by the same, yields may exhibit upward movement in the near-to-medium term.

Large supply by both centre and state government will continue to keep bonds under pressure. However, RBI is expected to smoothen out the uptick in yields through OMOs & G-SAP.

Strategy:

The progress of vaccination programme, global commodity prices and US Fed's stance on the revival of US economy remain key monitorable.

Our portfolios remain credit conservative with over 99% of Fixed Income Investments in Sovereign and AAA equivalent instruments.

AUM (in ₹ crs.)

Rating Profile

Group Corporate Bond Fund 2 (ULGF01213/10/08GCORBOND02121)

Fund Report as on 30th September 2021

Investment Objective

Provide returns that exceed the inflation rate, while taking some credit risk (through investments in corporate debt instruments) and maintaining a moderate probability of negative return in the short term. The risk appetite is 'low to moderate'.
