Suresh aged 35, is a successful entrepreneur who opts for Reliance Nippon Life Premier Wealth Insurance Plan with annual premium of ₹2,50,000 under regular pay option with a Policy Term of 20 years along with a life cover of ₹25,00,000.

Suresh is aware of the benefits of investing over the long term. He knows his investments in Reliance Nippon Life Premier Wealth Insurance Plan will be enhanced through Wealth Boosters at 0.30% p.a. (for Regular Pay option) of the average of daily fund value from the end of the eighth Policy year.

The addition to Suresh's Fund Value by way of Wealth Boosters, from the end of eighth year onwards, is as given in the table below:

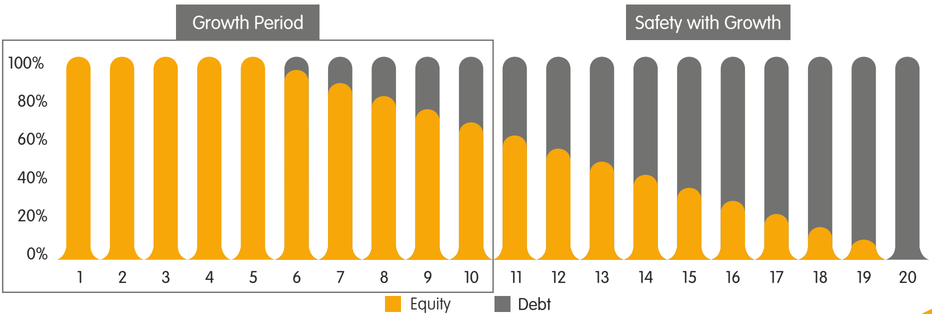
**The values shown in scenarios above are for illustration purpose only, based on assumed gross investment returns of 8% p.a. and 4% p.a. on unit fund. These are not guaranteed returns and are not the upper or lower limit of what one might get in this Policy.

Let's look at five different scenarios after Suresh invests in this Policy:

Scenario 1

Suresh does not get enough time out of his business and cannot manage his investments actively; therefore he opts for Target Maturity Option under Auto-Managed options. This strategy automatically manages his investments by changing the allocation between the debt and equity funds based on a predefined schedule. Starting from the sixth Policy year, as the time to maturity and to fulfill his financial goals draws closer, his investments are moved from equity oriented fund and to a debt oriented fund. The schedule for allocation in each year is as below



Scenario 2

Suresh likes to take control and thus opts for the Self-Managed option. He decides to invest in Life Equity Fund 3, since he believes the equity markets will be bullish in the coming years. He stays invested till maturity of the Policy.

The expected benefit received by Suresh is as follows:

Premiums paid (₹)		Fund Value** at maturity	
Annual amount	Total amount paid	@8% p.a.	@4% p.a.
₹2,50,000	₹50,00,000	₹99,32,826	₹63,42,408

Scenario 3

After three years of staying invested in the Life Equity Fund 3, Suresh feels that equity market will be going down soon due to the recent turmoil within the economy. He switches his investment to Life Corporate Bond Fund 1. He has thus locked in the returns from the rise in the equity markets and is now enjoying stable returns from the bond market.

Scenario 4

At the end of the tenth Policy year, Suresh decides to purchase a new car by utilizing his investments in this plan. He makes a partial withdrawal of 25% of his Fund Value.

Premiums paid (₹)		Fund Value** at end of year 10		Partial withdrawal of 25% of Fund Value** at end of year 10	
Annual amount	Total amount paid in 10 years	@8% p.a.	@4% p.a.	@8% p.a.	@4% p.a.
₹2,50,000	₹25,00,000	₹33,99,451	₹27,37,405	₹8,49,863	₹6,84,351

** The values shown in scenarios above are for illustration purpose only, based on assumed gross investment returns of 8% p.a. and 4% p.a. on unit fund. These are not guaranteed returns and are not the upper or lower limit of what one might get in this Policy.

Scenario 5

In the third Policy year, Suresh dies in an unfortunate accident. His wife, who is his nominee, gets the Death Benefit.

II. Auto-Managed Option

This option is suitable for you if you want automated options to manage your investments. Under Auto-Managed Option you can choose between Target Maturity Option and Life Stage Option. You can opt for these options at Policy inception or anytime during the Policy Term. Your entire fund that includes existing funds and renewal/top-up premiums will be invested as per the selected auto-managed options.

a) Target Maturity Option

When you plan for long term goals, it may be beneficial to initially invest a higher proportion in equity to enjoy higher potential returns. However, as you approach the date of fulfillment of your goal, you may want to ensure safety of your investments through a higher allocation to debt.

How does Target Maturity Option work?

» **Allocation based on term of your Policy**

Under this option, your investments will be allocated between Life Equity Fund 3 and Life Corporate Bond Fund 1. During the first five Policy years, 100% of the allocation will be in Life Equity Fund 3. From the sixth Policy year, any renewal premium or Top-up that you invest will be allocated between Life Equity Fund 3 and Life Corporate Bond Fund 1 based on the allocation schedule for that Policy year. From the sixth Policy year, the allocation of your investments in Life Equity Fund 3 shall be based on the below formula (rounded down to 2 decimal places)

$$\text{Allocation in Life Equity Fund 3} = \frac{\text{Outstanding Policy Term} - 1}{\text{Policy Term} - 5}$$

The balance shall be allocated in the Life Corporate Bond Fund 1.

Example: For Policy Term 10 years and 15 years, the allocation between Life Equity Fund 3 and Life Corporate Bond Fund 1 shall be as below:

Policy Term 10 years						
Outstanding Policy Term in years	10-6	5	4	3	2	1
Life Equity Fund 3	100%	80%	60%	40%	20%	0%
Life Corporate Bond Fund 1	0%	20%	40%	60%	80%	100%

Policy Term 15 years											
Outstanding Policy Term in years	15-11	10	9	8	7	6	5	4	3	2	1
Life Equity Fund 3	100%	90%	80%	70%	60%	50%	40%	30%	20%	10%	0%
Life Corporate Bond Fund 1	0%	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%

- **Rebalancing from 6th Policy year**

Avoid the hassle of switching your funds and actively managing your investments, this strategy rebalances the equity and debt ratio automatically, without any manual intervention.

As the Policy nears maturity we will re-distribute your investments at the start of each Policy year in a fixed ratio which depends upon the years to the maturity of the Policy. Starting from sixth Policy year your Fund Value shall be rebalanced as necessary based on the allocation for that year as defined in the above formula.

Therefore, the proportion of your investment in Life Equity Fund 3 will reduce in equal proportion and get transferred to Life Corporate Bond Fund 1 to ensure systematic transfer of your investments to a safer asset as you approach the maturity of the Policy.

This strategy systematically reduces your allocation in equity as your Policy nears maturity. This will help you to mitigate any downside risk in the equity market later in the Policy Term.

b) Life Stage Option

Your financial needs evolve over time and keep changing with your life-stage. For instance, your goals will change post marriage as responsibilities increase or your goals may be very different when you are nearing retirement. Hence, it is important that your Policy adapts itself to your changing needs.

If you need a systematic approach based to financial planning which adjusts your investments based on your age, you can opt for the Life-Stage Option.

How does the Life Stage Option work?

» Age based management

At the inception of your Policy, your investments will be distributed between two funds, Life Equity Fund 3 and Life Corporate Bond Fund 1, based on attained age. As you move from one age band to another, the renewal premiums and top-up premiums will be allocated based on attained age.

The age-based allocation distribution is shown in the table below:

Attained age of Life Assured (years)	Life Equity Fund 3	Life Corporate Bond Fund 1
0 – 10	90%	10%
11 – 20	80%	20%
21 – 25	75%	25%
26 – 30	70%	30%
31 – 35	65%	35%
36 – 40	60%	40%
41 – 45	55%	45%
46 – 50	50%	50%
51 – 55	45%	55%
56 – 60	40%	60%
61 – 65	35%	65%
66 – 70	30%	70%

» **Rebalancing**

On a quarterly basis, units shall be rebalanced as necessary to achieve the above proportions of the Fund Value in the Life Equity Fund 3 and Life Corporate Bond Fund 1. The re-balancing of units shall be done on the last day of each Policy quarter. The above proportions shall apply until the last ten quarters of the Policy are remaining.

» ***Safety towards the end of your Policy Term:***

As your Policy nears its maturity date, it is important that short-term market volatility does not affect your accumulated savings. In order to achieve this, your investments will be systematically transferred to Life Money Market Fund 1 in ten installments in the last ten quarters of your Policy.

You may change the Investment Option twice during every Policy year. You can choose to move from Self-managed option to Auto-Managed option and vice-versa. Further, you will have the flexibility to change your allocations within Auto-Managed Option from Target Maturity Option to Life Stage Option and vice-versa. This facility is provided free of cost, any unutilized change cannot be carried forward to the next Policy year.

- **Fund Value Details**

» **Computation of NAV**

The NAV will be computed as per IRDAI (Linked Insurance Products) Regulations, 2019.

The NAV for a particular fund shall be computed as: Market Value of investment held by the fund plus the value of current assets less the value of current liabilities and provisions, if any. This gives the net asset value of the fund. Dividing by the number of units existing at the valuation date (before creation/redemption of units), gives the unit price of the fund under consideration.

In case the valuation day falls on a holiday/non business day, then the exercise will be done on the following working day.

We reserve the right to value less frequently than daily in extreme circumstances, where the value of the assets may be too uncertain. In such circumstances we may defer the valuation of assets for up to 30 days until the company feels that the certainty as to the value of assets has been resumed. The deferment period of the valuation of assets will be with prior consultation with IRDAI.

» **Allocation of units**

The Company applies premiums to allocate units in one or more of the unit linked funds in the proportion which the policyholder specifies. The allotment of units to the policyholders will be done only after the receipt of premium proceeds as stated below;

In case of New Business, units shall only be allocated on the day the proposal is completed and results into a Policy by the application of money towards premium.

In the case of renewal premiums, the premium will be adjusted on the due date, whether or not it has been received in advance. (This assumes that the full stipulated premium is received on the due date.) Renewal premiums received in advance will be kept in the deposit account and will not earn any returns until the renewal premium due date on which the same will be applied to the unit funds.

» **Redemptions**

In respect of valid applications received (e.g. surrender, switching, etc.) up to

3.00 p.m. by the company, the same day's closing unit price shall be applicable. In case of a holiday or non-business day the closing unit price of the next business day shall be applicable.

In respect of valid applications received (e.g. surrender, switching, etc.) after 3.00 p.m.

by the company, the closing unit price of the next business day shall be applicable.

The unit price for each segregated fund provided under this product shall be made available to the public in the print media on a daily basis. The unit price will also be displayed in the web portal of the Company.

» **Cancellation of units**

To meet fees and charges except Premium Allocation Charge and FMC and to pay benefits, the Company will cancel the units to meet the amount of the payments which are due. If units are held in more than one Unit Linked Fund, then the Company will cancel the units in each fund to meet the amount of the payment. The value of units cancelled in a particular fund will be in the same proportion as the value of units held in that fund is to the total value of units held across all funds. The units will be cancelled at the prevailing unit price.

The FMC will be priced in the unit price of each Fund on a daily basis.

» **Policy Fund Value**

The value of your Policy fund at any time is the total value of units at that point of time in a segregated fund i.e. total number of units under a Policy multiplied by the Net Asset Value (NAV) per unit of that fund. If you hold units in more than one Unit Linked Fund, then the value of the fund is the total value across all Unit Linked Funds. Note that all Fund Values including Top-up funds are aggregated.
